

Security Analyst (Python/Java developers)

Who we are

Founded with the goal of helping organizations continuously improve their security posture, we have built our company on the foundation of penetration testing and vulnerability research, and our team of intelligence experts are some of the best in the industry.

Securin offers a comprehensive portfolio of tech-enabled services, including Attack Surface Management (ASM), Vulnerability Intelligence (VI), Penetration Testing, and Vulnerability Management. These capabilities allow our customers to gain complete visibility of their attack surface, stay informed of the latest security threats and trends, and proactively address their risks. By utilizing these services together, clients can have a proactive and holistic view of their security posture and protect their assets from the most advanced and dynamic attacks.

Securin's Vision

We promise continuous security posture improvement, enhanced attack surface visibility, and proactive prioritization of remediation for every business.

What we deliver

Companies do not need another tool; they need expertise and talent. Securin acts as an extension of your security team. We help identify and remediate the most dangerous exposures, vulnerabilities, and risks that exist in your environment and deliver predictive and definitive intelligence to facilitate proactive remediation. Our combination of domain expertise, cutting-edge technology, and services makes Securin a leader in the cybersecurity industry.

Job Summary:

We are seeking candidates with strong programming and communication skills interested in switching over to the cyber security domain. Candidates will be trained in cyber security to support our Continuous Security Posture Improvement vision.

The successful candidate will be responsible for ensuring the security of the Client's systems by proactively identifying, validating and prioritizing vulnerabilities and providing actionable threat intelligence. This position involves coordinating and leading routine vulnerability management, penetration testing and remediation oversight on Client's systems as required as per industry standards.

Key Requirements

Education and Experience:

- Undergraduate degree or Masters in Information Security, Computer Science,
 Computer Engineering, or related field, or equivalent experience with CGPA 8 or above in UG and 85% or above both in 12th and 10th.
- Any certification in DevSecOps/DevOps and Cloud is a plus

Work timings: 2PM – 11 PM

Location: Chennai (Work from office - Hybrid model for now)

Technical Requirements:

- The ideal candidate should possess proficiency in one of the following technology stacks: MERN, MEAN, Dot net, Python, Java, or any other relevant stack.
- Knowledge on DevSecOps/DevOps and cloud related technologies will be a plus.
- Understanding of cybersecurity principles and would be considered advantageous.
- **Experience**: We are open to both freshers and candidates with up to two years of experience, provided they demonstrate strong coding skills.

Feel free to apply if you meet these qualifications.

Soft Skills:

- Excellent oral and written communication skills and comfort with presenting technical issues to all levels of management, as well as non-technical staff.
- Ability to work collaboratively in a team environment.
- Strong analytical and critical thinking skills.
- Ability to work in a fast-paced and constantly evolving environment.
- Detail-oriented with strong organizational skills.
- Demonstrated ability to maintain confidentiality and handle sensitive information.

About the opportunity:

• For students graduating in **2025**, there is an opportunity for a 6-month internship with a provisional job offer, which may transition to a full-time position contingent on their performance.

Salary Structure:

- Full-time employees will commence with a salary of 8 Lakh Per Annum (LPA).
- Interns will receive a stipend of 15,000 INR, and the full-time job offer commences at 8 LPA.

Why should we connect?

• We are a bunch of passionate cybersecurity professionals who are building a culture of security. Today, cybersecurity is no more a luxury but a necessity with a global market value of \$150 billion.

At Securin, we live by a people-first approach. We firmly believe that our employees should enjoy what they do. For our employees, we provide a hybrid work environment with competitive best-in-industry pay, while providing them with an environment to learn, thrive, and grow. Our hybrid working environment allows employees to work from the comfort of their homes or the office if they choose to. For the right candidate, this will feel like your second home.

If you are passionate about cybersecurity just as we are, we would love to connect and share ideas.
